Dynamometer and road test of Zelnicker Ever-Tyte Piston Rings in Ford Engine—by Thos. A. Edison engineers.

Edison's engineer says this: "With Zelnicker Ever-Tyte Piston Rings the following improvements in engine were shown over the old ring:

12% more power
25% more compression
12% less gasoline used
35% less carbon deposit
10% less wall friction."

"The Zelnicker Ever-Tyte Piston Rings have been tested on a block dynamometer and on the road for 2000 miles in a Ford car and have proved satisfactory in every respect. I recommend them very highly to the trade in general."—H. W. Almqvist, Automotive Engineer, Thos. A. Edison, Inc.

The remarkable standing of the Zelnicker Ever-Tyte Ring among mechanical engineers is due to its eight years record in every type and size of engine under every conceivable condition. Engineers recognize it as the only ring whose construction has made practical the use of "three point expansion."
